Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-82 are rejected under 35 U.S.C. 103(a) as being unpatentable over Templeton et al.(US 5679940A) and Schnall(US 2002/0116323A1).

Templeton et al. disclose the dual scoring system and scoring algorithm(entire document). However, Templeton et al. does not disclose the positive/negative ranges. Schnall discloses credit score number range in para 0026. Therefore, it would have been obvious to one of ordinary skill in the art the time the Applicant's invention was made to modify the teachings of Templeton et al. to include the step of Schnall. The motivation to combine these references is to effectively consider people who have higher risk scores than the average, but are otherwise solid risks from the merchant's perspective.
